

StaBALL Match

- Medium-range BALL® powder designed for medium-caliber cartridges
- Perfect for medium-sized game or long-range precision shooting
- Provides optimal loading density in cartridges appropriate for the burn speed, which is ideal for high-BC heavy for caliber bullets in 223 Remington, 224 Valkyrie, 22-250 Remington, 308 Winchester, 30-06 and many more
- Velocity levels obtainable, depending on the cartridge, are 15-23 m/s greater than other propellants in its class
- Contains a copper-reducing agent to deliver more shooting time between cleaning
- Similar burn rate to Hodgdon Varget
- Available in 1-LB and 8-LB canisters

StaBALL 6.5

- Mid-range BALL® powder designed for medium-caliber cartridges
- Perfect for medium-sized game or long-range precision shooting
- Ideal for 6 Creedmoor, 6GT, 6.5 Creedmoor, 7MM-08, 270 Winchester and many more
- Increased velocity, 9-61 m/s than other similar fast propellants
- Contains a copper-reducing agent to deliver more shooting time between cleaning
- Similar burn rate to Hodgdon 4350
- Available in 1-LB and 8-LB canisters

StaBALL HD

- Slow-burning magnum BALL® powder designed for large, overbore cartridges
- Perfect for big game hunting and long-range shooting in all types of conditions with larger cartridges
- Ideal for 6.5 PRC, 7MM Remington Mag, 300 PRC and many more
- Velocity levels obtainable, depending on the cartridge, are 15-23 m/s greater than other propellants in its class
- Contains a copper-reducing agent to deliver more shooting time between cleaning
- Similar burn rate to Hodgdon Retumbo
- Available in 1-LB and 8-LB canisters
